SUMMARY

Full-stack product developer building workflow-heavy software across web, desktop, and cross-platform applications. Recent work spans React and Next.js product platforms, a .NET Windows app for 3D manufacturing workflows, and a Flutter + Rust utility suite. Strongest fit is product engineering where UX clarity, maintainable architecture, and real operational use all matter.

CORE SKILLS

Full-stack web development (primary): React, Node.js, Express, MySQL, PostgreSQL

ADDITIONAL SKILLS

Web dependencies: Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Framer Motion, Material UI, React Router, TanStack Router, Prisma, Sequelize, REST APIs, auth, validation, uploads

Desktop development: .NET 8, C#, WinUI 3, Win2D, AssimpNet, MVVM, iText 7, screenshot and document workflows

Cross-platform and local-first: Flutter, Dart, Rust, Flutter Rust Bridge, FFI, on-device processing, encrypted storage, FFmpeg, multi-platform release

Data and delivery tooling: SQLite, Git, Docker, GitHub Actions, CI/CD pipelines, build and release workflow support

EXPERIENCE

Software Engineer — Product, Web & Desktop

Dec 2024 – Dec 2025

Printalytix

Bengaluru, India

- Built customer-facing and internal product surfaces across React and Node-based systems with upload-heavy flows, validation, and protected operations.
- Worked on **MIND**, a .NET 8 Windows desktop app for 3D model inspection, manufacturing guidance, screenshots, and report generation.
- Contributed across frontend, backend, and workflow design instead of staying in a single layer of the stack.

Volunteer — Full-Stack Development

Oct 2023 – Jan 2024

Old Dominion University

Norfolk, VA, USA

- Built a university threads platform with role-based access, discussion flows, and real-time messaging.
- Delivered an examination management system covering assessment workflows, submissions, and administrative coordination.
- Worked on backend queries, caching, and application structure to keep the platform responsive as features expanded.

SELECTED PROJECTS

Pettige | Flutter, Rust, SQLite, FFmpeg

- Cross-platform local-first utility suite with **30+ tools** across PDF, image, audio, video, QR, OCR, encrypted storage, and developer workflows.

Open Solar Toolkit | React 19, TypeScript, Tailwind, DnD Kit

- Role-based solar operations platform spanning **7 workstreams** across sales, planning, supply chain, installation, maintenance, and reporting.

MIND Manufacturing Intelligence | .NET 8, WinUI 3, Win2D, AssimpNet

- Windows desktop workflow for 3D model analysis, manufacturing guidance, screenshots, and structured report generation.

Potential Client Website + Resolute | Next.js, React, Tailwind, EmailJS

- Company platforms with reusable content systems, routed inquiry flows, and multi-vertical presentation across biotech and B2B delivery.

EDUCATION

Bachelor of Computer Applications (BCA) — Computer Science

Aug 2018 – Aug 2024

Bengaluru North University

Bengaluru, India

- 6 years: extended due to COVID-related semester delays and a 1-year gap.
